LANGUAGES

Spanish (native)
English: B2 Cambridge

EDUCATION

Game Design and Development Master
EVAD: Sept 2022 - Dec 2023

Web application developer - Dual
CESUR: Sept 2017 - June 2019

Developer of applications for Android devices
UMA: Summer 2017

ABOUT ME

Frontend Engineer and Technical Lead specialized in design systems, scalable component architecture, and AI-driven automation for frontend engineering.

I led the development of the Chi Design System, used by 200+ developers across Lumen, improving consistency, performance, and engineering quality at scale.

My work combines advanced frontend engineering with automation frameworks, MCP tooling, and AI-assisted workflows that accelerate delivery, reduce defects, and enhance developer experience.

I thrive in collaborative environments where I can mentor teams, define long-term technical strategy, and build robust ecosystems that empower developers.

CAREER HIGHLIGHTS

Led the Chi Design System used by 200+ developers
Defining architecture, component standards, and long-term strategy to ensure performance, accessibility, and consistency across multiple teams.

Built an MCP automation framework with 27+ custom tools
Enabling automated component scaffolding, documentation, testing, and maintenance, significantly accelerating development workflows.

Reduced UI defects and improved release stability
Implementing automated visual regression pipelines (BackstopJS) that detected inconsistencies early in the development cycle.

Migrated multiple large-scale applications from Vue 2 to Vue 3
Including architectural redesign, dependency updates, and developer onboarding.

Enhanced CI/CD workflows
Using GitHub Actions, Jenkins, Kubernetes, and AWS, improving build times, deployment reliability, and automation coverage.

TECH STACK & AI AUTOMATION

Frontend Development
JavaScript (ES6+), TypeScript, Vue 3, Nuxt 4, StencilJS, Web Components, HTML, SCSS

Architecture & Engineering
Design systems (Chi, UXPin, Figma), reusable component design, asynchronous services, performance optimization & accessibility

Testing
Cypress, Playwright, BackstopJS, Vitest

DevOps & CI/CD
Jenkins, GitHub Actions, K8S (Rancher), AWS

Collaboration & Leadership
Git/GitHub, Agile methodologies, Mentoring, onboarding & cross-team communication, Technical decision-making & documentation

AI & Automation
AI-assisted development (Copilot, agents), MCP automation tools (27+), automated component/documentation/testing workflows, custom Cursor rules & skills

EXPERIENCE

TECHNICAL LEAD – CHI TEAM

LUMEN

2023 - PRESENT

Lead engineer responsible for the architecture and evolution of Lumen's Chi Design System, enabling scalable UI development for 200+ developers.

GitHub: https://github.com/CenturyLink/Chi

Key Responsibilities

- Built and maintained 50+ reusable components (StencilJS, Vue 3, TS).
- Designed async services and libraries for UXPin and Figma.
- Managed CI/CD workflows (GitHub Actions, Jenkins, Kubernetes, AWS).
- Implemented Cypress, Playwright, and BackstopJS pipelines.
- Led Vue 2 → Vue 3 migrations and mentored engineering teams.

SENIOR FRONTEND ENGINEER (CONTRACTOR) – CHI TEAM

VIPIRSA - *Lumen Contractor*

2021 - 2023

Contributed to the Chi Design System, focusing on reusable components, architecture improvements, and cross-team collaboration.

GitHub: https://github.com/CenturyLink/Chi

Key Responsibilities

- Developed UI components in Vue 2/3 and StencilJS.
- Improved performance, structure, and documentation.
- Collaborated with UX, product, and engineering teams.
- Supported unit, integration, and visual regression testing.

MIDDLE FRONTEND DEVELOPER
EY
Feb 2021 - Jul 2021

Frontend developer building scalable Angular 11 modules for a new healthcare platform.

Key Responsibilities

- Developed components and async services.
- Implemented PWA features and unit tests (Jasmine/Karma).
- Integrated PostgreSQL and ensured cross-platform compatibility.

JUNIOR FRONTEND DEVELOPER
INDRA
Jul 2019 - Feb 2021

Worked on Angular 7 applications for transportation-sector projects, focusing on UI development and service integration.

Key Responsibilities

- Built UI components and async services.
- Improved code quality and maintainability.
- Worked with Cassandra and Agile workflows.

JUNIOR FRONTEND DEVELOPER (INTERN)
ACCENTURE
Sept 2017 - Jun 2019

Developed Angular 6 components for international aviation projects while learning modern frontend practices.

Key Responsibilities

- Contributed to modules and UI components.
- Maintained and refactored existing code.
- Worked in Agile environments with Jira and Confluence.
